

Sat Nav, ICE, Audio & TV

How do i remove tv in motion

You need vcds to do this

VCDS can be used to set the speed limit at which the TV will go off and receive the warning in the MMI, The default is usually set between 4 and 7 MPH, you will also need to unlock the security using vcds, a code generator and full instuctions are in the links below

[for the D3 model with MMI 2GI](#)

[for the D3 Model with MMI 3G](#)

Unique solution ID: #1019
